

How long does it take to install a Kleenoil Onboard Oil Recycling System?

Typical installation time only takes 30 minutes! There are no dangerous electrical hookup so you don't have to worry about zapping any electrical systems by installation of our product, which can lead to costly warranty issues at later dates. Anyone with mechanical skills can safely install one of these units as the unit only needs to be mounted and the two lines ran (high pressure feed line, low pressure return line).
